The scientific and practical manual is aimed at improving approaches to the implementation of criminal liability for crimes in the field of procurement for state and municipal needs (including taking into account the experience of regulatory regulation and law enforcement practice in criminal prosecution in a number of foreign countries).

The paper examines the problems and contradictions that arise during the application of criminal law and criminal procedure norms in criminal proceedings on crimes in the field of procurement for state and municipal needs. In addition, the issue of maintaining the necessary balance between the obligation of judicial investigative bodies within their competence and the powers assigned to them to take measures to ensure economic security and the obligation to respect the rights and legitimate interests of participants in economic relations involved in criminal proceedings is being considered. Most of these areas are being considered in Russian legal science for the first time.

Legislation is current as of June 1, 2023.

For researchers, practicing lawyers, teachers, graduate students, students of law schools and faculties studying in legal specialties, as well as for a wide range of readers interested in this issue.
